RE: Water Main Construction

As we continue to improve our water distribution system, the Northern Kentucky Water District (NKWD) will be installing new water mains, water services, and other water main related equipment in your area beginning the week of **April 1, 2024**. This project is estimated to be completed in **May 2024** (subject to change). NKWD has contracted with Jack Gemmer & Sons, Inc. for this project.

Work will be performed on Walker Lane from Turkeyfoot Road to the end of Walker Lane. We appreciate your patience and understanding as we work to maintain and upgrade your water supply system.

Traffic will remain open to through traffic for access to homes. "No Parking" signs will be posted when applicable.

If you are aware of any private utility in the right of way, such as underground electric, sprinkler systems, invisible dog fences, etc., please notify NKWD immediately.

### Lead Piping

If we discover that the service line leading from the public water main to your house appears to be made of lead, we will notify you and provide more information and next steps.

### Contact

During the construction, I, Andrew Horton, will be the inspector representing the Northern Kentucky Water District, and supervising the work as it progresses.

If you have any questions or concerns pertaining to the construction, you can reach me at (859) 426-2729 during the hours of 7:30 AM and 4:00 PM. For after-hours and weekend emergencies, please contact our answering service at (513) 244-9016.

You can learn more about the Northern Kentucky Water District on our website: <https://nkywater.org/>

Respectfully,

Andrew Horton  
Construction Inspector  
Northern Kentucky Water District
